

# P&C Uniform Shop Report for 14/05/2019

## Polar Fleece Jackets

Jackets have been received and distributed to the students.

## WiFi

Since the start of term 2 we do not have access to the school wifi.

We have had the school IT consultant Greg looking into this and it turned out that the Department of Education has made some changes and due to these changes, our current set up does not allow us to have access to some websites.

There are 2 options: re-configure the 2 computers or go with a WiFi Hub with sim card (this will cost the school approx \$100-\$200 per year.)

## Girls Uniforms

Deb has the survey to the school ready and this will be distributed to the parents this week or next week latest.

Deb has received a few samples from suppliers. These samples have been narrowed down to 2 options that has been approved by Matthew Fuller.

The survey will ask the parents if their daughters would like to wear the girl's pants option. This will give us an indication of how many to order and what sizes. It also asks for approval to try on the samples.
